NAKATA et al Appl. No. to be assigned December 7, 2004

AMENDMENTS TO THE ABSTRACT:

Please amend the Abstract as follows:

An enclosure (1)-is formed of an outer case (2)-and a lid-(3). The outer case (2) includes a first projecting strip portion (7)-provided on a top face side of the outer case (2)-and on an outer peripheral portion (5)-defining an opening (4), and extending to project outwardly from the outer case (4), and the lid (3)-includes a second projecting strip portion (10)-provided at a position facing the first projecting strip portion (7). With the opening (4)-of the outer case (2)-closed with the lid-(3), the first and second projecting strip portions (7, 10)-make close contact with each other along a direction in which these portions extend. This structure can protect the inside from an external factor such as rainwater or dust.
